Dimension Level Scores

The weighted score of all aggregated criteria level scores within one of the Dimensions (Environmental, Social or Governance & Economic).

Criteria Level Scores

Criteria level scores represent the significant material ESG themes within industries, which roll up into the three dimension level scores based on S&P Global's materiality-weighted scoring framework. There are approximately 15-30 criteria per industry, consisting of both general themes applicable across industries (such as Corporate Governance, Climate Strategy, Labor Practice indicators, among others), and industry-specific themes (such as Sustainable Finance, Electricity Generation, Social Impact on Communities, Passenger Safety, among others).

Comparison to Industry

Percentile ranking, industry average and industry max scores are calculated based on the industry. Related statistics may include a mix of current and past assessment year scores. All values are on a scale from 0 to 100 (max).

Weights

For each industry, our scores prioritize ESG factors based on their expected magnitude (degree of impact) and the likelihood of their impact (probability and timing of impact) on a company's financial standing, according to growth, profitability, capital efficiency, and risk measures. Factors are additionally assessed according to their overall impact and importance on stakeholder and the natural environment. For each row, weights are shown as a percentage of the total weight of 100.
